Munich, Germany

Tech lead on the in-house student ERP of Germany's largest university: technical owner of three domains and five services, from the ministry rule to the domain model. Leads by building, teaching and challenging; builds agents that triage production bugs and prepare the fix. Strong opinions, open to the better argument, no shortcuts.

TECHNICAL LEADERSHIP

Tech lead of one of five teams on a university ERP: owns three domains, sets the bar, mentored 10+ engineers.

SOFTWARE ARCHITECTURE

Domain-driven services on Kafka that stayed changeable through five years of shifting ministry rules.

AGENTIC ENGINEERING

Agents that triage production bugs and propose fixes at work; a lights-out agent factory at home.

EXPERIENCE

IU International University Munich · 2021 – today

Tech Lead 2024 ← Full-Stack Developer 2021

In-house student ERP of Germany's largest university (~150k students), five teams: NestJS, Kafka, MySQL, Vue, AWS.

- **Domain owner.** Tech lead of one of five teams; owner of and go-to person for 3 domains and 5 services.
- **Ministry rules.** Guided ministry-driven rule changes into business processes, then into domain models.
- **Student lifecycle.** Leave of absence, programme change, cancellation and their interplay, modelled in DDD.
- **Integration.** Kafka + transactional outbox; SharePoint via his DAM service, Salesforce via the CRM bridge.
- **NestJS foundation.** Custom decorators, interceptors, guards; an ESLint plugin encoding domain rules; 300+ specs.
- **Continuous improvement.** Node 24, NestJS 11, Datadog monitoring, faster local dev — many small iterations.
- **Mentoring.** Onboarded 10+ engineers and taught them DDD, NestJS and Kafka — in pairing, review, refinement.
- **Bug-triage agent.** Watches Datadog, classifies bugs, drafts root causes, opens fix MRs after human sign-off.
- **Agentic setup.** Spec-driven Claude Code; 7 MCP servers give the team's agents Datadog, Kafka, DB and Jira.

SquareTrade San Francisco · 2018 – 2020

Full-Stack Data Engineer

Device protection plans sold through retailers. ETL ingestion and analytics: Spring Boot, Informatica, Python, PostgreSQL.

- **Merchant onboarding.** Integrated new retail partners into the ingestion pipeline for protection plans.
- **Merchant access.** Contributed to the IAM service that let merchants manage their own users' access.

Edelweiss72 & Sheraptec Munich · 2015 – 2018

Web Developer, part-time

Web agencies, alongside studies — TYPO3 and PHP sites for clients including dm, SWM and Deloitte.

HOW I WORK

Simple, never a shortcut. The stable, simple solution that holds at scale — a shortcut is deferred cost.

Challenge and teach. Pushes engineers to their best work; strong opinions, open to the better argument.

Fast and careful. Speed from safety nets — monitoring, alerting, automated triage — not skipped steps.

Agents close the loop. Triage, fix, review, deploy, verify by agents — a human gate where the risk is.

BUILDING IN PUBLIC

5,200+ commits across 30+ repositories in the last twelve months — products, infrastructure and agent tooling.

Agent factory Claude Code · MCP · Bun · Python 2026

Self-hosted lights-out loop: agents triage, fix, review, deploy and verify; a 24/7 assistant; STT/TTS.

FreePlanningPoker Next.js · WebSocket · Postgres 2023

Real-time planning poker for agile teams — 10k users and 170k estimates, free and without signup.

BasaltUI React · Mantine · visx 2026

React design system on npm, built for agents to compose — charts, app shell, agent chat. 8k downloads a year.

RollHook Go · TypeScript · Docker Compose 2026

Zero-downtime rolling deploys for Docker Compose via webhook or GitHub Action — ships this site.

SKILLS

Architecture

Domain-driven design · Event-driven systems · Transactional outbox · Hexagonal · CQRS

Backend

TypeScript · Python · Bun · Node.js · NestJS · Kafka · PostgreSQL · MySQL · Redis

Agentic

Claude Code · Codex · OpenCode · Pi · Hermes Agent · MCP · Agent orchestration · Model routing · STT / TTS

Platform

AWS · Docker · Terraform · Cloudflare · GitLab CI · GitHub Actions · Datadog · OpenTelemetry

Frontend

React · Astro · Vue · TanStack · Mantine · D3 / visx · Micro-frontends

Languages

German (native) · English (fluent)

Outside work

Powerlifting, hiking, skiing and surfing — and long walks with the dog.

EDUCATION

B.Sc. Economics & Computer Science Munich University of Applied Sciences · 2015 – 2020

Thesis project: a Bitcoin payment service validating transactions before block confirmation.
